RISHI MAKWANA

AI Engineer

rishimakwana05@gmail.com | linkedin.com/in/rishii-makwana | github.com/Rishi5031 | +91 7016009309 | Ahmedabad, Gujarat

PROFESSIONAL SUMMARY

AI Engineer with a full-stack background, currently focused on building LLM-powered applications — including a RAG-based course generation system that turns prompts or PDFs into structured learning content. Comfortable working across the stack, from LangChain/LangGraph agent workflows on the backend to React interfaces on the front end. Looking to bring that same practical, ship-it approach to production AI systems.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend Frameworks:** FastAPI, Django, Node.js, Express.js, RESTful APIs, LangChain, LangGraph
- **Frontend & UI:** React.js, Redux Toolkit, Tailwind CSS, Bootstrap, Responsive Design
- **Databases:** MySQL, PostgreSQL, MongoDB, Vector DB(Chroma , Pinecone)
- **Authentication & Authorization:** JWT, OAuth 2.0, RBAC
- **Developer Tools:** Git, GitHub, Docker, GitHub Actions, Postman, Vercel
- **AI Technologies:** Google Gemini API, OpenAI API, Hugging Face, RAG, Prompt Engineering

EXPERIENCE

Full Stack Developer 12/2024 – 06/2026

Excelsior Technologies

- **Architected a Learning Management System** with separate Admin, Student, Provider, and Landing applications on a Vite-powered React monorepo — shared component library across apps cut new-feature build time by roughly a third.
- **Built an AI-powered course generation system** using LLMs and RAG, letting instructors turn a prompt or an uploaded PDF into a complete, structured course — what used to take a couple of days now takes a few hours.
- **Designed AI workflows to auto-generate course modules, quizzes, assignments, and learning objectives**, making AI generation the default starting point for new course content rather than a supplementary tool.
- **Engineered a student analytics module** that surfaces personalized performance reports, flags strengths and weak areas, and generates AI-driven learning recommendations — replaced what was previously a manual, spreadsheet-based review process.
- **Built backend services with Node.js, Express.js, and Sequelize**, including RBAC, enrollment management, and RESTful APIs, to support the platform in production.

PROJECTS

CodeGuardian AI – AI PR Reviewer GitHub | LiveDemo

Tech Stack: Python, FastAPI, React.js, LangChain, LangGraph, GitHub API, Docker

- Built an AI-powered PR review platform that connects to GitHub via OAuth and personal access tokens, letting developers browse repositories, pull up individual PRs, and inspect code changes in real time rather than switching back to GitHub's own UI.
- Built the review engine around a structured evaluation pipeline: it summarizes each diff, flags security, performance, and code-quality issues, scores the PR overall, and generates specific improvement suggestions — closer to a first-pass reviewer than a generic linter.
- Built the full stack on React, FastAPI, and PostgreSQL with the GitHub REST API — includes repository sync, a history of past AI reviews, repo-level health analytics, and per-repository settings so teams can tune what the reviewer checks for.

DocIntel – AI PDF Chatbot GitHub | LiveDemo

Tech Stack: Python, FastAPI, React.js, LangChain, VectorDB (Pinecone), Google Gemini/OpenAI, JWT

- Built a chatbot that lets users upload a PDF and ask questions about it directly, using RAG so answers are grounded in the document instead of the model's general knowledge.
- Handled the document pipeline end-to-end: parsing PDFs, chunking text, generating embeddings, and storing them in PineconeDB for semantic search at query time.
- Added chat history and document management so users can revisit previous conversations and manage multiple uploaded documents, with JWT-based auth to keep each user's documents private.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering 2022 – 2026

LJ Institute of Engineering and Technology

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Cloud Computing, Web Technology.

CERTIFICATES

The AI Engineer Course 2026: Complete AI Engineer Bootcamp: ude.my /UC-ec431d71-ebd3-44ad-b67f-3f804ea74888

FastAPI - The Complete Course 2026 (Beginner + Advanced): ude.my/UC-0acfa2e4-8bef-469b-8a1e-8619a4c0c39d
